GOOD OLD DAYS

- WHAT DID WE PROTECT OUR CHILDREN FROM?
- PEOPLE
- PLACES
- THINGS

HOW DID WE PROTECT THEM?

- AVOIDING HARMFUL PEOPLE, PLACES AND THINGS
- CHAPERONES
- CONFINING TO

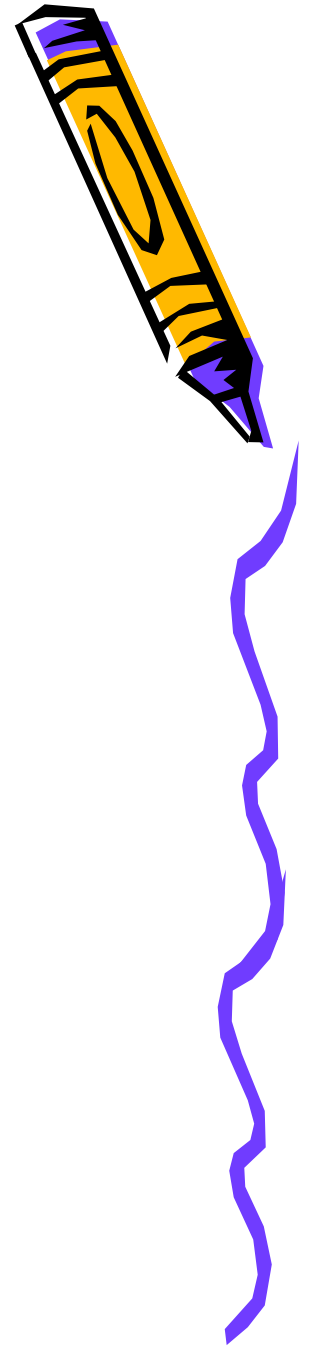

.....HOME

....THIS WAS THE SAFEST PLACE TO BE!!

NOT SO NOW!!

- THE COMPUTER ERA HAS INTRODUCED AN 'INVISIBLE' ENEMY TO YOUR CHILD'S INNOCENCE
- AND...WORST OF ALL.....

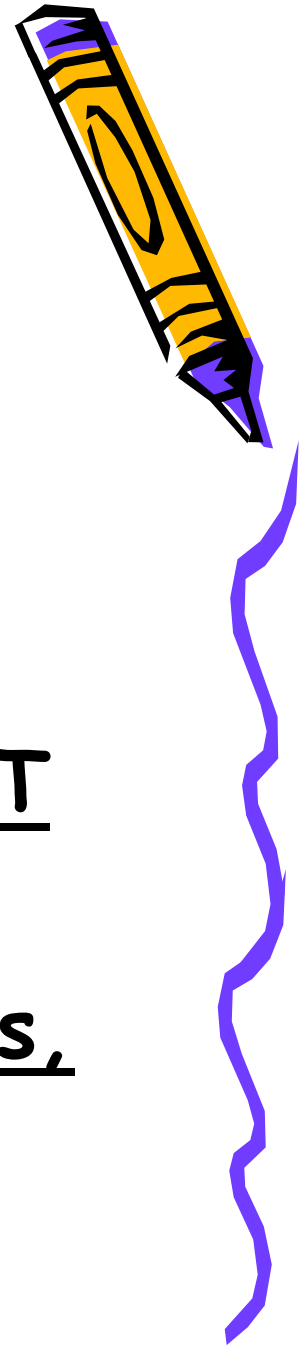

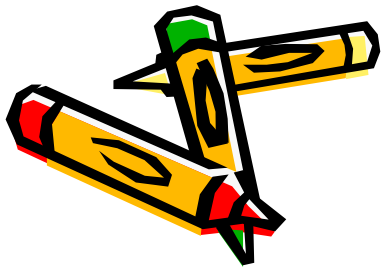

.....IT INFILTRATES
YOUR HOME

AND GOES BY THE NAME

HARMFUL INTERNET CONTENT

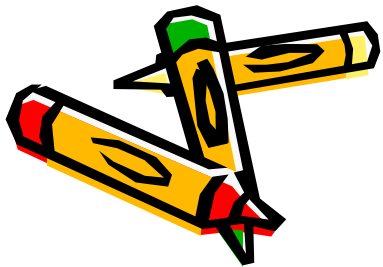

Aka

pronography, gambling, expletives,
violence...

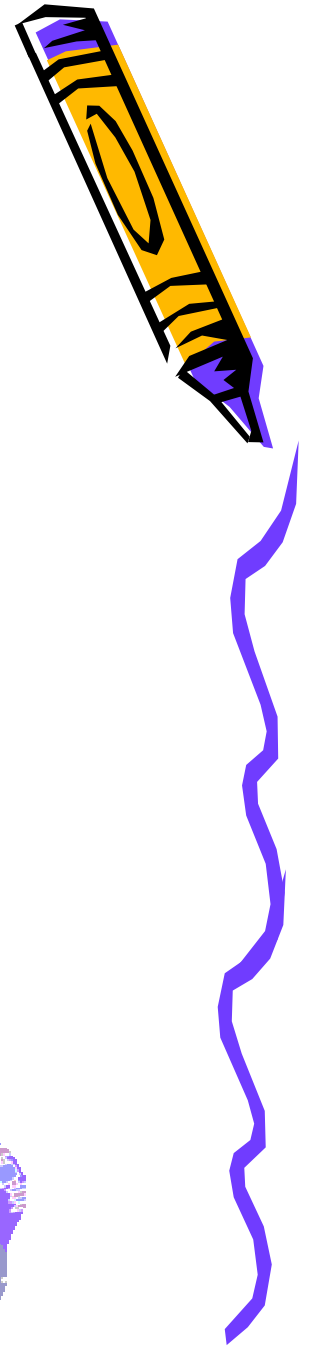

Parental Control Software

the most effective tool to help
protect children on the
Internet

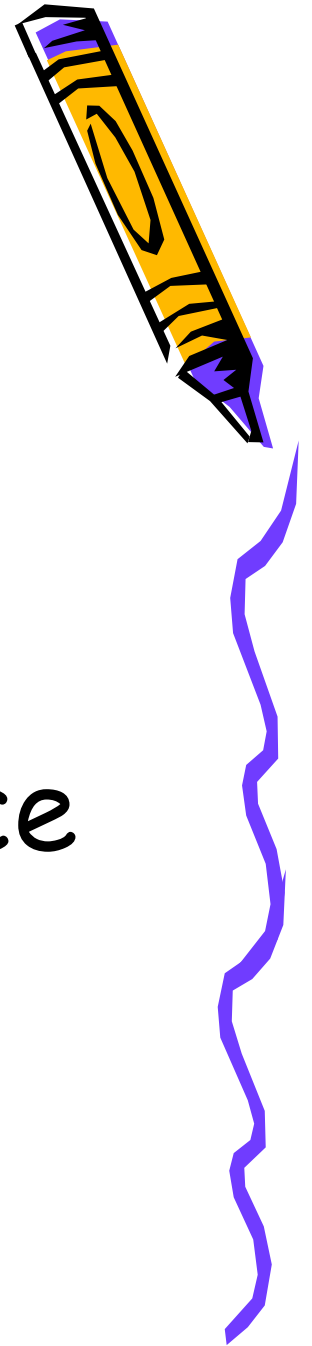

Parental Control Software

- protects children from divulging personal information online.

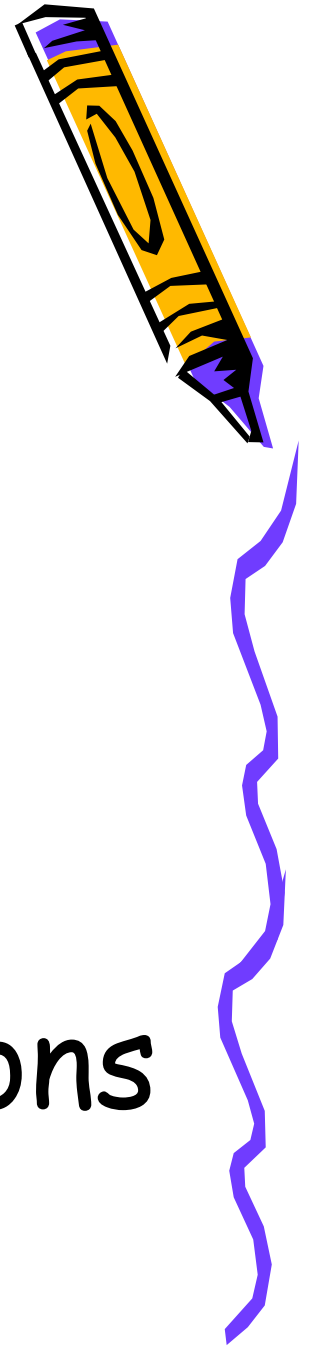

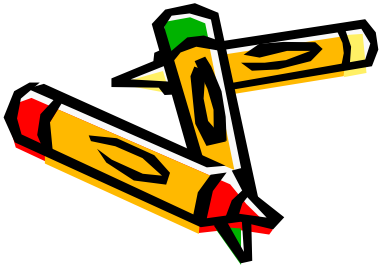

Parental Control Software

- helps protect against the dangers children face online from harmful web site content, and

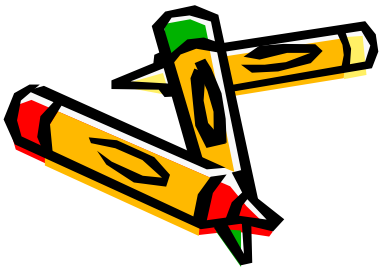

Parental Control Software

- can safeguard them against inappropriate language in chat sessions

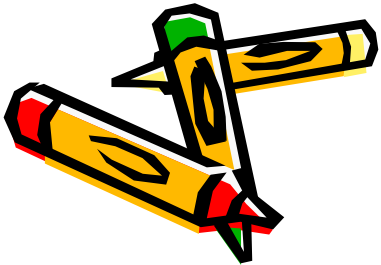

How it works

- Parental Control Software lets you manage and control children's access to the Internet

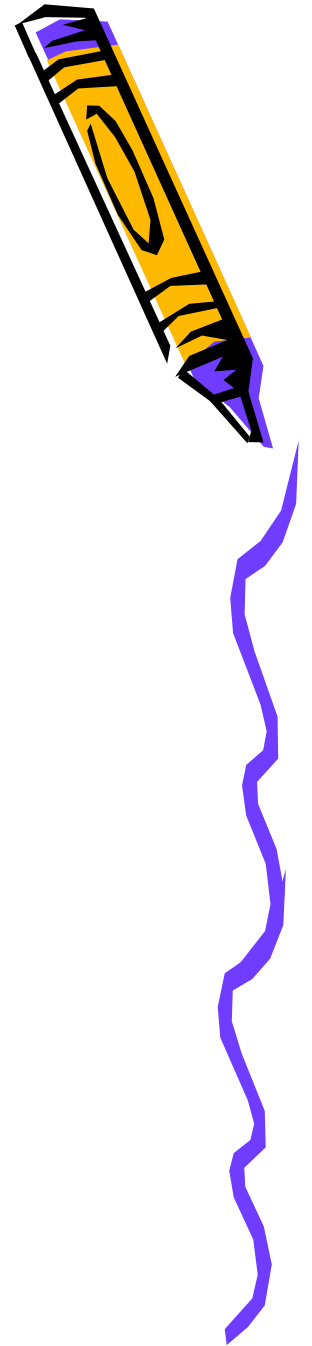

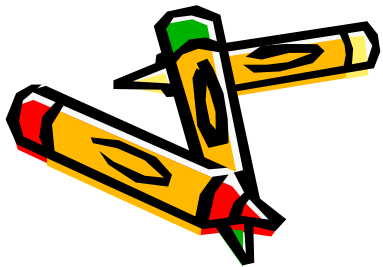

How it works

- limits or prevents their access to programs, such as games or confidential and personal information located on your home PC.

Who are using it?

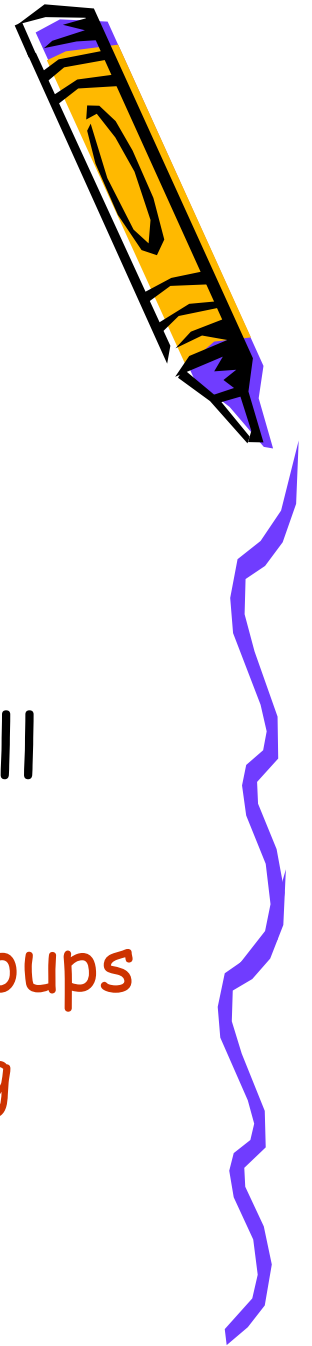

- ❖ Parents
- ❖ schools
- ❖ libraries

What you can expect

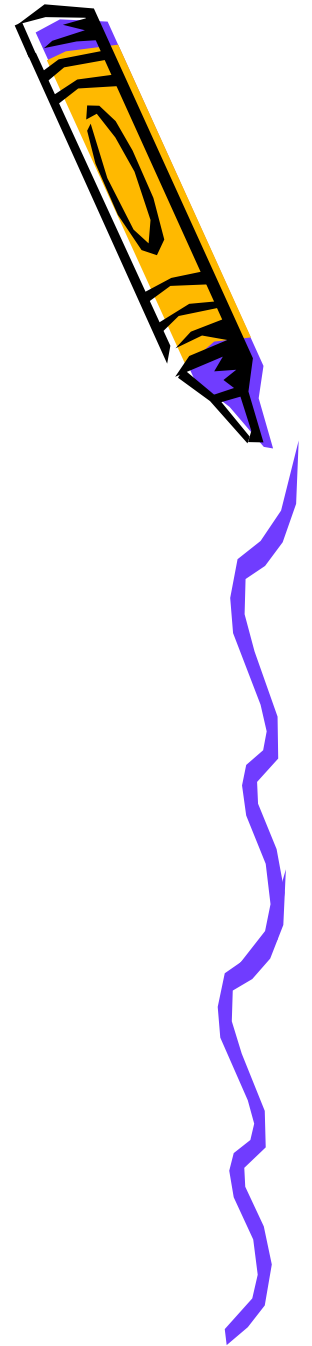

Parental Control Software often offers features to manage when, where, how and to whom access is allowed, filtered or blocked, as well as:

- Blocks harmful websites and newsgroups
- Restricts chat and instant messaging
- Filters web based e-mail

What you can expect

- Manage time online and access to programs
- Control program downloads
- Protect personal identity
- Aid in creating your own lists of allowed or blocked sites

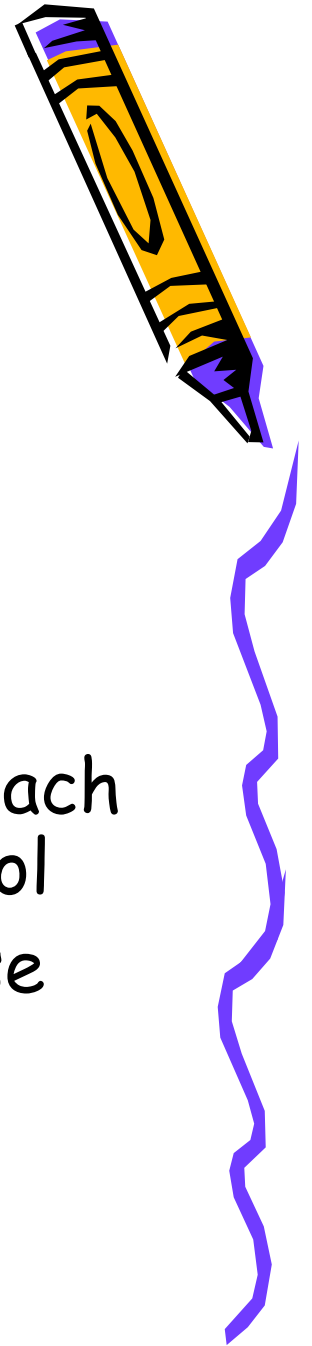

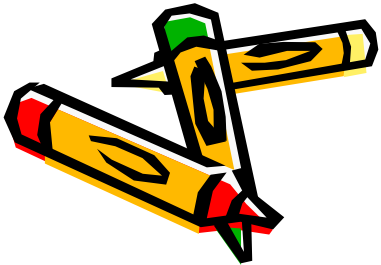

The ICRA SYSTEM

- The **Internet Content Rating Association** is an international, independent organization that empowers the public, especially parents, to make informed decisions about electronic media
- ICRA empowers parents to make choices about what their children can and cannot see on the internet. Choice not censorship is the phrase that best sums up their philosophy.

ICRA

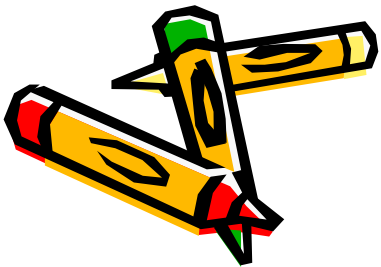

- Tries to filter based on parents' not a national view of what is good or evil
- Gives parents a flexible approach to content management
- Uses a 'content label' which authors attach to their site; it is used as a filtering tool
- It urges all authors to use code as those without codes are blocked by default

Resourceful Tips for Parents

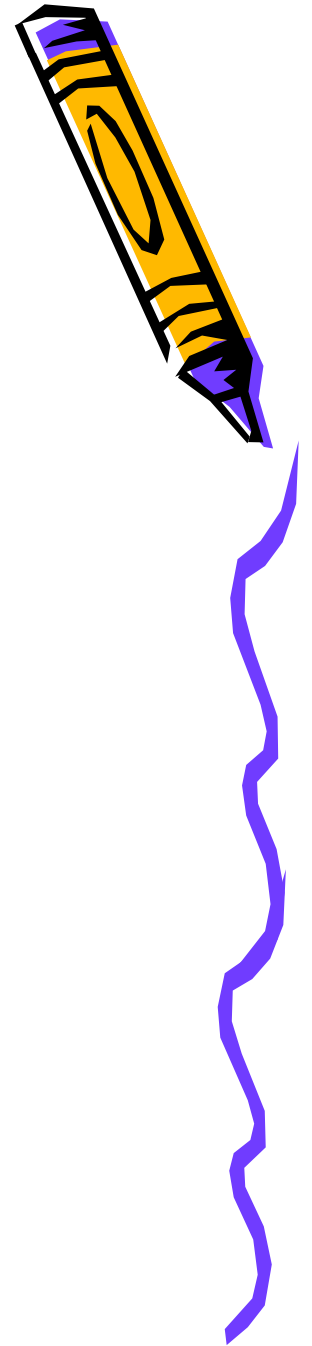

- Help to make your child's experience on the internet a positive one by educating yourself first!
- [The parents' child protection guide for the internet](#)
Good advice for all parents!
- [Children's bill of rights for the internet](#)
A colourful poster designed to be printed out and displayed right next to your child's computer to remind them that they have a right to be safe!
- [The family online internet safety contract](#)
This is a fun way to start a conversation with your children and help them to keep themselves safe.

Parent Control Software

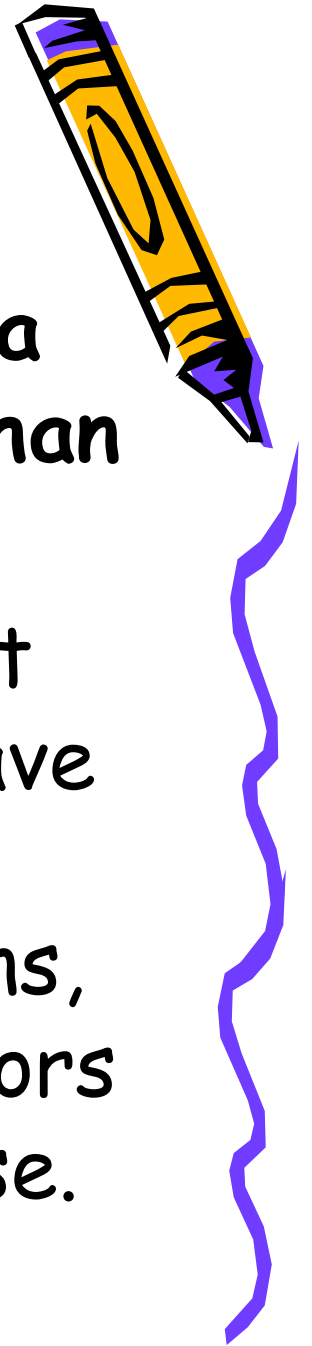

- CyberSitter
- Cyberpatrol
- InterGO
- Surfwatch
- NetNanny
- Internet in a Box for Kids

Parent Control Software

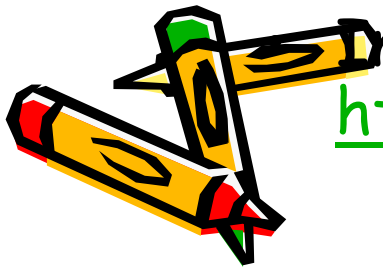

For Parents Whose Children Know a Lot More About the Computer Than They Do:

- Bet on Surfwatch. It is the easiest to install, no maintenance if you have the subscription service. It is the most upfront about blocking actions, and the least restrictive. It monitors only Internet content not other use.

Useful information

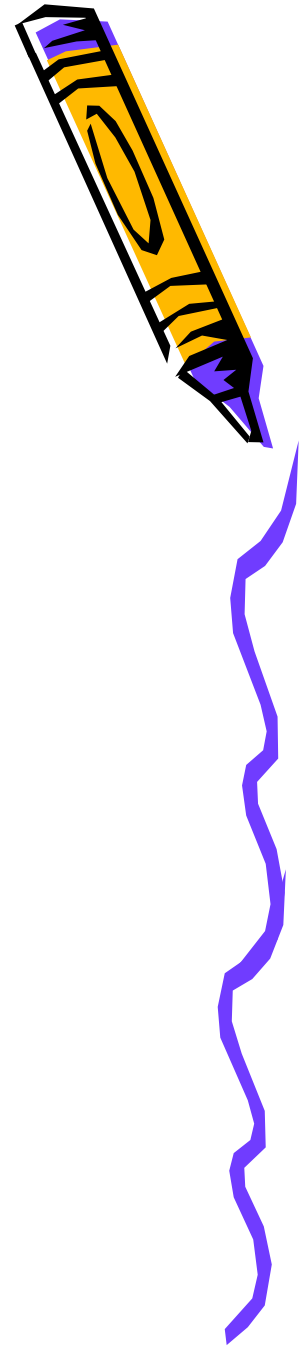

- **Keyloggers:** Spy software intended for monitoring all aspects of user activity. Logs all keystrokes so that you can get every reply they've done in online chat, every e-mail sent.
- Ghost Keylogger - <http://www.keylogger.net/>
- SpyAnytime - <http://www.waresight.com/>
- Home Keylogger Free Edition - <http://www.kmint21.com/keylogger/>

Invisible Keylogger -
<http://www.invisiblekeylogger.com>

To all the JCS members who are parents...

- Wish you luck!
